

Lattice Plotting System

Anandu R

Basics

Using `xyplot` to create a scatter plot Ozone vs Wind

```
library(datasets)
library(lattice)
airquality = transform(airquality, Month = factor(Month))
xyplot(Ozone~Wind, data = airquality)
```

Using xypplot to create separate scatter plots of Ozone vs Wind for each month

```
library(datasets)
library(lattice)
airquality = transform(airquality, Month = factor(Month))
xypplot(Ozone~Wind | Month, data = airquality, layout = c(5,1))
```
